Logan Tang

studying Statistics and
Data Visualization

Davis, CA 95616

(626) 808-2162

log.gstang@gmail.com

Summary

Detail-oriented analyst focused on clarity, structure, and meaningful interpretation. I specialize in turning complex technical and analytical work into plain-language insights that support decision-making.

My statistical and computational background allows me to evaluate system performance through user studies, and data-driven analysis while aligning stakeholders and refining workflows.

Education

Bachelor of Science, Statistics
University of California, Davis
September 2022 - June 2026

Relevant Coursework

Experimental Design · Linear Models · Probability Theory · Data Visualization · Statistical Computing · Multivariate Analysis

Data & Tools

- Statistical Computing: Python, R, SQL
- Visualization: Tableau, ggplot
- Web & APIs: HTML/CSS, JavaScript, FastAPI

Work Experience

DATA ANALYST & DEVELOPER | Sep. 2024 - Present

VIDI Lab - COEQWAL Initiative

- Independently proposed and led a 57-participant user evaluation study assessing our lab's novel visualization methods.
- Managed regulation compliance, recruitment, survey design, and data-cleansing
- Designed a mixed-methods evaluation integrating task performance, engagement, and cognitive load measures.
- Conducted comparative analysis across five evaluation axes, synthesizing quantitative metrics and qualitative feedback to inform iterative design decisions.
- Demonstrated user preference for novel visualizations through statistically supported comparative evaluation.
- Co-authored a peer-reviewed paper presenting results from this evaluation, accepted to IEEE VIS 2025.
- Coordinated with 10+ teams translate high-level frameworks and stakeholder goals into clear system requirements for an AI-powered policy analysis platform.
- Designed and implemented a Svelte-based interface with a FastAPI backend, integrating the OpenAI API.
- Delivered three demos to the Executive Committee on behalf of the visualization team, communicating technical concepts to non-technical stakeholders.

ASST. CLINICAL TRIAL ANALYST | Sep. 2024 - Dec. 2024

California Liver Research Institute

- Cleansed and standardized 50+ patient's data from an electronic medical registry (EMR) for a clinical trial on a fatty liver drug.
- Identified and rectified inconsistencies in lab results, physician notes, and patient records to ensure data accuracy and integrity.

Skills

Statistical Analysis & Modeling

- Experimental Design
- Model Fitting
- Comparative Analysis
- Quantitative Inference

Data Wrangling and Evaluation

- Data Cleaning
- Validation
- Metric Design
- Mixed-Method Analysis

Data and Communication

- Data Visualization
- Insight Synthesis
- Stakeholder-Facing Interpretation
